*... on track
for you!*

Starting in 1992 as a wholesaler for construction machinery spare parts, Linser Industrie Service GmbH has transformed into a leading specialist for the manufacture of undercarriage components and wear parts in the construction industry.

Establishing our own technical department has made us an OEM supplier for several construction equipment manufacturers today. We are not limited to only supplying spare parts, but also assemble track groups or complete ready-to-use undercarriages.

Company-owned
subsidiaries

100%
sales coverage in Europe

5,000
items always in stock

12,000 m²
central warehouse

We incorporate our technical knowledge into the development of new machines, ensuring an ideal configuration for your specific application.

Following our own specifications, we only produce at ISO-certified production facilities in order to ensure our quality standards. Regular inspections of the material quality and production processes guarantee that our products always meet the same high standards. In turn, this ensures that your machines work when you need them.

Steel undercarriages

Our tracks are greased or lubricated depending on the application, which reduces wear and ensures a long service life.

Our excavator tracks with a t-type master pin can be locked without a hydraulic press. Our chains with split master links for bulldozers and track type loaders are just as easy to assemble.

Undercarriage components

for mini excavators and construction equipment

Steel tracks

sealed, lubricated as well as greased

Rubber pads

chain-on, bolt-on or clip-on type

Rubber tracks

width from 150–900 mm

Rubber pads and tracks

In order not to damage the surface, we offer various rubber pads like chain-on, bolt-on and clip-on types. We have different types of rubber pads for excavators and road finishers available!

LIS also provides high quality rubber tracks with endlessly wound steel wire inside that makes the LIS-tracks extra tear-resistant. The robust rubber compound also ensures the required strength.
